ABOUT ME

Software Engineer with a Bachelor of Science in Computer Engineering and experience developing and deploying full-stack web applications. Skilled in building software solutions for practical applications, with projects involving cloud deployment, system design, computer vision, and database-driven systems. Interested in Application Security and AI-driven development for real-world impact.

WORK EXPERIENCE

Software Developer | Marinduque State University - ICTU Data Center *January 2026 – March 2026*

- Developed and deployed the Engineering Student Organization Auditing System for the College of Engineering, streamlining transaction handling and digitalizing the clearance signing process, currently used by hundreds of users.
- Managed and resolved database-related issues for the Internet Access Management System, improving system reliability in the ICTU computer laboratory

EDUCATION

Marinduque State University, B.S. in Computer Engineering *Aug 2022 – May 2026*

Relevant Coursework: Data Structures & Algorithms, Software Design, Computer Networks and Security, Operating Systems, Digital Signal Processing, Software Development.

PROJECTS

ESO Auditing System | Team Lead & Full Stack Developer *Feb 2026 – April 2026*

- Awarded Certificate of Recognition by the Dean of Engineering for system design and implementation.
- Developed and deployed a full-stack auditing system for the College of Engineering, streamlining clearance and transaction processing.
- Currently used by hundreds of students and staff, improving operational efficiency and reducing manual work.

RoboTilapia Web App | Team Lead & Full Stack Developer *Sept 2025 – Nov 2025*

- Integrated AI-based computer vision for fish behavior detection in tilapia fishponds.
- Developed an IoT aquaculture system using Arduino sensors for real-time water quality monitoring (pH, temperature, ammonia, dissolved oxygen).
- Provides automated alerts, feed scheduling, and analytics using React, Firebase, and IoT technologies.

AquaLasTech Web App | Full Stack Developer *Feb 2024 – April 2024*

- Recognized as Top 1 Ranked System in Software Design subject defense for system design and functionality.
- Developed a full-stack management system for water refilling operations, handling orders (online or walk-in), inventory, and business processes.
- Provides real-time analytics and reporting to support data-driven decision-making.

CERTIFICATIONS

- Responsive Web Design** – freeCodeCamp (HTML, CSS, responsive layouts, and modern web design principles)
- The Complete JavaScript Course 2024** – Udemy (Jonas Schmedtmann) (JavaScript fundamentals, advanced concepts, practical development techniques, and AI-assisted coding)
- Full Stack Development** – freeCodeCamp (frontend and backend development, APIs, and database integration)
- Networking Basics** – Cisco (fundamentals of networking, IP addressing, routing, switching, and network troubleshooting)
- Introduction to Cybersecurity** – Cisco (cybersecurity principles, common threats, attacks, defense strategies, and security best practices)

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, C, C++, Java

Frameworks & Tools: HTML, CSS, React, Tailwind CSS, React Native, Node.js, Express.js, MySQL, MongoDB, PostgreSQL, RESTful APIs

Cloud, AI & Security: Cloudflare, Railway, Vercel, Netlify, Firebase, AI-assisted development tools, computer vision applications, cybersecurity fundamentals, network security, vulnerability assessment

Systems & Other Tools: Linux (Ubuntu), MATLAB, Arduino IDE, VS Code, Figma, Github, Git
